By choosing EcoBoard, you are making the decision to use a sustainable and environmentally compatible product which has been developed and tested for 27 years.

We continually strive to engineer superior products with strength at their core. Our team works closely with customers to understand their requirements and develop products in alignment with their applications. EcoBoard products are manufactured using top-of-the-line German machines and technology, and bonded with a unique resin formula. Our open-source technology approach encourages a growing global community to adapt a sustainable strategy.

We work with farmers to acquire natural fibres from agricultural waste which form the central element of EcoBoard's products. With EcoBoard, you are helping to create additional incomes for rural villages which depend on agriculture for their livelihoods, along with doing your part to preserve the environment.

Thank you for being a part of our journey, we are honored to be a part of yours.
